PROFILE INFO

Highly motivated Python Backend Developer with expertise in building multi-functional Telegram bots and automating business processes using Odoo ERP. Experienced in full-stack development with Python, Aiogram, and PostgreSQL. Dedicated to delivering efficient, scalable, and high-quality software solutions.

EXPERIENCE

TELEGRAM BOT DEVELOPER (FREELANCE) 2024 – Present

- Designed and developed a comprehensive Telegram Shop Bot with a full cart system, product catalog, and an integrated administrative panel.
- Built a Barbershop Management Bot for automated appointment scheduling, service listings, and real-time customer reminders.
- Implemented secure PostgreSQL database architectures for efficient data tracking and inventory management.

ODOO ERP SPECIALIST (LEARNING & DEVELOPMENT) 2024 – Present

- Customizing Odoo 17 modules focusing on Inventory and Business Process Automation.
- Configuring PostgreSQL integration and modular enhancements for business workflows.

ACHIEVEMENT

2024 – Present
Successfully developed and deployed 3+ Telegram bots using Python and Aiogram, automating local business tasks.

2024 – Present
Earned professional certifications in Python Backend and Odoo ERP Customization from Mohirdev, mastering database design and ERP workflows.
